## TITLE INDEX

### A

Accelerator, *Surprises from remotely controlled linear* Se125  
 Accelerometer, *Mercury-drop* Jy101  
 Actrus-auto-controlled turbine run-up Jy90  
 Adaptive control Mr 112, Je116  
 Adaptive control through parameter perturbation De125  
 Adaptive control versus conventional design Jy101  
 Adaptive controller now flying in X-15 De124  
 Adaptive systems, *Design of limit-cycling* Fe114  
 Adaptive systems, *Ifac symposium on self-* Je114  
 Adaptive systems using models, *Self-* Au97  
 Agricultural tractors, *Symposium on* Je113  
 Air bearings, *Load compensation for* Jy97  
 Aircraft, *Electrical control in* by J. J. Foody Ap103  
 Aircraft, I.E.E./R.Ae.S. conference on *The importance of electricity in the control of* Ap103  
 Alarm annunciator No139  
 Alice in Wonderland by D. R. Dudgeon De95  
 Ammonia vaporizers, *Stability and control of* J. C. Farquhar Ja89  
 Analogue computer Fe135, No139  
 Analogue computer study of a multi-variable control system by P. C. Chiu and C. R. Webb Jy77  
 Analogue Computing Committee Oc129  
 Analogue computing device for process control Oc123, No127  
 Analogue-to-digital converters (Control Survey 24) by R. E. Fischbacher and A. E. S. Mills Je119, Jy facing 84  
 An approach to cold-mill automation by H. D. Morgan and M. H. Butterfield No92  
 Anglo-Dutch get-together, *An* by I. V. Idelson My130  
 Animal-feed making, *Automated* Se112  
 Antibiotic fermentation under control by E. Emmerson Se92  
 Arc-furnace power, *Controlling* by L. McGee and A. Metcalf Oc91  
 Argus for C.E.G.B., Ferranti Je131  
 Artix power station Ja115  
 Assembly at Vauxhall's, *Auto-* Ja119  
 Assembly, *Automatic* by David Foster Je110, Jy85  
 Attitude control, *Satellite* by B. Stewart Ap84, My145  
 Authors in Control Ja127, Fe128, Mr129, Ap129, My184, Je135  
 Auto-land Ja126, Ap124, Je132  
 Auto-land in Varsity, *Triple* Oc118  
 Automated mechanical handling by David Foster De102  
 Automatic assembly by David Foster Je110, Jy85  
 Automatic control of hydraulic forging presses by W. Gregson and G. Cooper Je99  
 Automatic control theory, *Liapunov's method in* by P. C. Parks No102, De109  
 Automatic flying-shear cut-off Je116  
 Automatic inspection machines by David Foster Ap92, My141  
 Automatic production of resistors Je118  
 Automatic road building Jy102  
 Automatic sorting by David Foster No95  
 Automatic spacing of cartons My170  
 Automatic store, *The* by David Foster Se101, Oc101

Automatic wrapping by G. A. Simpson De99  
 Automation, *Aspects of modern* by David Foster Mr88, Ap92, My141, Je110, Jy85, Se101, Oc101, No95, De102  
 Automation centre proposed No131  
 Automation in the rayon industry by J. W. Bunting Mr116  
 Automation trust My180, De129  
 B  
 B.A., *Data processing and transmission at the* by Denis Taylor Oc88  
 B.C.A.C. Ap79, Ap115, Ap125, No131  
 B.C.S. conference Au104  
 Bimcam Fe79, Fe106  
 Bisra Je132, Jy105, Oc91  
 B.R. pantograph-test train Fe122  
 B.R. solid-state signals Fe123  
 Brit. I.R.E. symposia:  
     Data transmission Fe125  
     Practical electronic aids for the handicapped My133  
     Recent developments in industrial electronics My132  
 Banking as a data-processing industry by S. Handel Mr105  
 Batch-blending at Shell-B.P. Jy91  
 Batching cement automatically Mr122  
 Batching paint automatically Mr123  
 Battery-vehicle control by s.c.r. My169  
 Bearings, *Elimination of friction effects in* Ja112  
 Bibliography of automatic control Mr114  
 Binary divider Mr133  
 Biological control systems, *Man-made and* Se122  
 Birmingham, University of Au104  
 Blender, *Regen Oil's fuel* Jy93  
 Blending at Shell-B.P., *Batch-* Jy91  
 Blending, *Viscosity and oil-* Jy94  
 Books reviewed—by titles  
     Algorithm for translating chemical names to molecular formulas, *An* by Eugene Garfield My188  
     Analogue computation by R. W. Williams Se134  
     Analysis and design of non-linear feedback control systems by G. J. Thaler and M. P. Pastel Jy111  
     Analysis of non-linear control systems by Dunstan Graham and Duane McRuer Jy111  
     Annual review in automatic programming, Volume 2 by Richard Goodman My188  
     Approach to cybernetics, *An* by Gordon Pask Ap138  
     Automatic control and computer engineering edited by V. V. Solodnikov Ja138  
     Automatic process control by W. F. Coxon De137  
     Brain as a computer, *The* by F. H. George My188  
     British miniature electronic components and assemblies data annual 1962-63 edited by G. W. A. Dummer and J. Mackenzie Robertson Se134  
     British transistor diode and semiconductor devices data annual edited by G. W. A. Dummer and J. Mackenzie Robertson Oc134  
     Calculus of variations by L. E. Elsgolc Au108  
     Collected works of John von Neumann, *The Volume 1* by A. H. Taub De137  
     Computer applications by B. Mittman and A. Ungar My188  
     Computer control systems technology edited by Cornelius T. Leondes Fe140  
     Computer handbook edited by H. D. Haskey and G. A. Korn De137  
     D.C./A.C. converters for d.c. amplifiers by E. Komolibus My188  
     Design of engineering systems, *The* by W. Gosling Au108  
     Design manual for transistor circuits by J. H. Carroll Ap138  
     Digital computation for chemical engineers by Leon Lapidus Se134  
     Digital data: their derivation and reduction for analysis and process control by D. S. Evans Se134  
     Dynamics of automatic control systems, *The* by E. P. Popov De137  
     Electromechanical components for servomechanisms by Sydney A. Davis and Byron K. Ledgerwood Ap138  
     Electronic digital computers by G. D. Smirnov Se134  
     Electronics—a bibliographical guide by C. K. Moore and K. J. Spencer Mr138  
     Experimental corereograms and Fourier transforms by N. F. Barber My187  
     Ferrites: an introduction for microwave engineers by R. A. Waldron My188  
     Flight test instrumentation edited by M. A. Perry Au108  
     Gasenladungsrohren by Norbert Kirchner My187  
     Handbook of automation, computation and control. Vol 3—Systems and components, edited by E. M. Grabbe, S. Ramo and D. E. Woolridge Au111  
     Hydraulic fluids and engineering applications by R. H. Warring Fe140  
     Hydraulics in mechanical handling by J. R. Fawcett Se134  
     Industrial engineering tables by S. Eilon Au111  
     Industrial process measuring instruments by Grady C. Carroll Au108  
     Inert atmospheres by P. A. F. White and S. E. Smith My187  
     Intelligent machines by D. A. Bell Jy111  
     Introduction to feedback systems by L. D. Harris Jy111  
     Introduction to linear network analysis, *An* by P. S. Farago Je144  
     Introduction to transients by D. K. McCleery Ja138  
     Machine-independent computer programming by Maurice H. Halstead De137  
     Magnetic amplifier analysis by D. L. Lafuze Jy111  
     Management games by J. M. Kibbee, C. J. Craft and B. Nanus Je144  
     Mathematical theory of linear systems, *The* by B. M. Brown Mr138  
     Mechanics of inertial position and heading indication, *The* by Winston Markey and John Hovorka Ja138  
     Method of least squares and principles of the theory of observation by Yu. V. Linnik Au108  
     Methodology for systems engineering, *A* by Arthur D. Hall Au111  
     Miniature and microminiature electronics by G. W. A. Dummer and J. W. Granville Ap138  
     Planning a computer system edited by Werner Buchholz Au108  
     Primer of Algol 60 programming, *A* by E. W. Dijkstra De137
